Profile

I'm a Full-Stack Developer with a founder's mindset. I develop with AI agents, take initiative and share responsibility with the team. I want to understand the whole product and what it does for the people using it. I'm currently Lead Developer at signteq.

How I work with AI

I use Claude and Codex to develop software, alongside other AI tools, harnesses and AI-powered IDEs. I spend my time on context, prompts and automation, and I build my own helpers when I need them. One example is an AI-powered PR review tool.

How I like to work

I care about clean code and working with people who help each other. I'm always learning, and I enjoy figuring things out. Family comes first, so work-life balance matters to me.

Recent experience

Lead Developer

[signteq](#) / Aug 2026 - present

I work with the team on digital contract and signature workflows, drawing on my experience in full-stack development.

Full-Stack Developer

[signteq](#) / Jan 2025 - Jul 2026

I developed software for digital contracts and signatures, including SaaS integrations and KYC processes.

Full-Stack Developer

[Dotbite](#) / Mar 2022 - Jan 2025

I built software products with the engineering team.

Work & education

Lukas Wittich / Curriculum vitae

Earlier experience

Co-Founder & Full-Stack Developer

[getsby](#) / From Aug 2020 · past operational role

I continued developing and maintaining the platform. I stepped away from day-to-day work years ago.

Backend Developer

[fiskaly](#) / Apr 2020 - Aug 2020

I designed and implemented a public REST API for cash register data exports and audits.

Co-Founder, CTO & Full-Stack Developer

[getsby](#) / Oct 2018 - Apr 2020

A fellow co-founder and I built a distributed ordering and payments platform. I worked on infrastructure, APIs, the backend, web and client apps, and POS integrations and adapters.

Web Developer

[Lawvision information systems](#) / Aug 2015 - Oct 2018

I planned, built and maintained web projects for business and legal tech customers.

Engineering strengths

Agentic development & automation / Full-stack product development / Distributed systems & APIs / POS adapters & payment integration / Vue / Nuxt & TypeScript / PHP / Laravel / Apps, AWS & infrastructure

Education & languages

BSc in Business Information Technology

University of Vienna / Oct 2013 - May 2017

German: native / English: fluent

Outside work

I'm a dad and a lifelong tech geek. Outside work, I like gaming and playing electric guitar. Family comes first.
